

Joshua Benjamin

Nationality: Nigerian (Nigeria) | **Gender:** Male | **Phone number:** (+234) 08107160494 (Mobile) |

Email address: chymezy332@gmail.com | **LinkedIn:** www.linkedin.com/in/Chymezy |

Address: 17 Sawmill Rd. Ewupe Sango Ota, 112212, Ogun, Nigeria (Home)

ABOUT ME

Experienced software engineer with a background in electronic engineering and a strong focus on full-stack development. Skilled in Python (Flask, Django), Express.js, React (Material-UI), and proficient with MySQL, PostgreSQL, and MongoDB. Currently pursuing a master's degree in system engineering. Proven ability to quickly adapt to new technologies and deliver innovative solutions. Passionate about leveraging software engineering to drive efficiency and cost reduction.

WORK EXPERIENCE

30/05/2022 – CURRENT Lagos, Nigeria

ENERGY ACCOUNTING ANALYST IKEJA ELECTRIC PLC

- Develop algorithms and tools for analyzing large datasets of energy consumption data using Python libraries such as pandas, matplotlib, and seaborn.
- Design and implement software systems to automate energy accounting processes, integrating energy monitoring devices and data acquisition systems with backend databases (MySQL, PostgreSQL).
- Collaborate with energy management teams to develop and maintain scalable web applications using frameworks like Django or Flask for backend development and React or Angular for frontend interfaces.
- Implement machine learning models for predictive analytics and develop APIs for real-time data retrieval and analysis to support decision-making for efficiency improvements.
- Visualize energy consumption insights through interactive dashboards and reports, enabling stakeholders to make informed decisions on energy usage optimization and compliance reporting.

02/05/2019 – 30/04/2022 Ogun, Nigeria

MAINTENANCE ENGINEER NIGERIAN FOUNDRIES LIMITED

- Analyze machine data and performance metrics to develop data-driven maintenance strategies using software tools and platforms.
- Design and implement condition monitoring software solutions to predict equipment failures and optimize maintenance schedules.
- Collaborate with data scientists and engineers to integrate predictive analytics models into maintenance practices, enhancing equipment reliability and reducing operational costs.

19/04/2018 – 20/03/2019 Ogun, Nigeria

MANAGEMENT GRADUATE TRAINEE NATIONAL YOUTH SERVICE CORPS (NYSC)

- Learn and apply software engineering principles to optimize foundry operations through digital solutions.
- Assist in the development and implementation of IoT (Internet of Things) devices and sensors to monitor and control foundry equipment.
- Collaborate with senior engineers to analyze data from production processes and identify opportunities for automation and efficiency improvements.

EDUCATION AND TRAINING

11/11/2012 – 22/11/2017 Umuahia, Nigeria

BACHELOR OF ENGINEERING (B.ENG) Michael Okpara University of Agriculture Umudike

Control System Engineering | | Control Logic Circuit | | Mathematical Method | | Computer Programming

Website mouau.edu.ng | **Field of study** Electrical & Electronics Engineering | **Final grade** 3.86 | **Level in EQF** EQF level 8

17/06/2022 – 10/04/2024 Lagos, Nigeria

SOFTWARE ENGINEERING African Learning Institute (ALX)

Object-Oriented Programming || Backend Development || Database Management || Software Development Lifecycle || Software Testing and Debugging || UI/UX Design || Deployment and DevOps

Website alxafrica.com | Field of study Software and applications development and analysis | Final grade A |

Level in EQF EQF level 7

10/11/2023 – CURRENT Lagos, Nigeria

MASTERS OF SYSTEM ENGINEERING University of Lagos (Unilag)

Website unilag.edu.ng | Field of study Software and applications development and analysis

DIGITAL SKILLS

Python(Flask) | Python (Django) | Programming with Python, Node js, Ruby, Bash, React, Js | Python (PyROOT, RDataFrame; ML: Keras, TensorFlow) | Programming Languages - C,C++,Java,HTML and MS SQL server | SQL, MySQL, MongoDB, SQL Server Management Studio | programming: Python, MATLAB and SQL | Data Analytics and Visualization using MSSQL, Postgresql, Tableau and PowerBI

CONFERENCES AND SEMINARS

19/08/2019 – 07/09/2019 Lagos Nigeria

Nigeria ICT Impact and Africa Digital Awards

Attended the prestigious Nigeria ICT Impact CEO Forum and Africa Digital Awards, engaging in keynote speeches, panel discussions, and interactive sessions led by renowned experts in ICT.

- Explored critical topics including digital transformation, cybersecurity, and emerging technologies, gaining valuable insights into industry trends and government policies
- Networked with industry leaders, government officials, and tech organizations, contributing to knowledge exchange and fostering collaboration to drive digital innovation and transformation in Nigeria and Africa.

PROJECTS

Titan Project

Energy Consumption Tracker (eTracker)

- Developed a web application using Python (Flask) for backend and JavaScript (React/Vue.js) for frontend.
- Designed to monitor and manage energy usage for both commercial and industrial users, promoting efficiency and cost reduction.
- Implemented features such as user registration/login, daily energy consumption logging, data visualization using charts, and analysis tools for energy trends.

Smart Grid Monitoring System

- Built a real-time monitoring system using IoT devices and cloud services.
- Designed backend APIs with Node.js (Express) and integrated with AWS IoT Core for data ingestion and processing.
- Developed a responsive frontend using React for visualizing grid performance metrics, including energy distribution, load balancing, and fault detection.

MANAGEMENT AND LEADERSHIP SKILLS

Qualities

Excellent communicator || Inspiring learning agilities || Self-motivation || Adaptability to Change || Attention to details.

HOBBIES AND INTERESTS

Technology Enthusiast

I am passionate about exploring new technologies and staying updated with industry trends in software engineering and energy management.

Energy Efficiency Advocacy

I am dedicated to promoting sustainability and energy efficiency. I actively participate in forums, seminars, and initiatives focused on reducing carbon footprint and optimizing energy consumption in both commercial and industrial sectors.

Continuous Learning

I have a strong interest in continuous learning and professional development. I regularly engage in online courses, workshops, and certifications related to software engineering, energy management, and system optimization.
